

August 6, 1984

Memo to File:

RE: Enercor/Solvex
Proposed P. R. Springs Tar
Sands Project
PRO/047/024
Uintah County, Utah

On July 17, 1984, Mr. Gene Pearson, BLM State Office, talked with Ron Daniels about the above referenced project to see if the Division had any concerns or if coordination between agencies is needed. On July 18, 1984, Jim Smith discussed the proposal with Mr. Pearson. The Division has only had a pre-permitting/pre-design meeting with the company to this point and has received no formal application since meeting on April 6, 1984. Mr. Pearson was advised that we are definitely interested and would like to be kept informed of any developments in the project so that processing the permit application can be coordinated between our agencies.

On August 1, 1984, I talked with Mr. Mark Lindsay and was informed that nothing has been filed to date regarding this project and that the Division would be notified when a decision to proceed is made. Enercor's main concern is performing the required reclamation at their former Rainbow Project site before beginning a new project.

James W. Smith, Jr. 
Administrator,
Mineral Resource Development
and Reclamation Program
